Nexora AI

Nexora AI is a self-hosted, company-ready AI operating system for research, content creation, social media management, business development, marketing, presentations, and website-to-video production.

It replaces paid third-party email services with your own SMTP account (Gmail or SendGrid), captures contact submissions in SQLite, and uses Google Gemini for advanced reasoning and creation.

Included modules

- **AI Chat & Research** — Gemini-powered assistant with company context.
- **Content Studio** — articles, ads, emails, landing copy, scripts.
- **Social Media Manager** — calendars, hooks, captions, hashtags, publishing plans.
- **Business Development Manager** — lead research, outreach, proposals, follow-ups.
- **Marketing Autopilot** — campaigns, audiences, offers, channels, KPIs.
- **Presentation & Video Studio** — website-to-video, narrated slides, avatar presenter.
- **Built-in Inbox** — contact submissions stored directly in SQLite.
- **Email Module** — Nodemailer over Gmail or SendGrid SMTP; no Resend subscription.
- **PWA** — installable app with offline shell and desktop/mobile support.
- **Light / Dark Mode** — persistent theme toggle.

Quick start

```
npm install
cp .env.example .env
npx prisma db push
npm run dev
```

For background video rendering:

```
redis-server
npm run worker
```

Gmail SMTP

Use a Google App Password, not your normal Gmail password.

```
SMTP_HOST=smtp.gmail.com
SMTP_PORT=587
SMTP_SECURE=false
SMTP_USER=you@gmail.com
SMTP_PASSWORD=your-16-character-app-password
```

SendGrid SMTP

```
SMTP_HOST=smtp.sendgrid.net
SMTP_PORT=587
SMTP_SECURE=false
SMTP_USER=apikey
SMTP_PASSWORD=your-sendgrid-api-key
```
